

Impact of Artificial Intelligence on Human Intelligence

Impact of Artificial Intelligence on Human Intelligence

- Nalina Sofia Theagarajan

Once upon a time ...

Humans invented computers.

And every day ...

Quality of life improved with this invention.

Until one day ...

Artificial Intelligence performed all activities.

And because of this ...

He need not do manual labor.

And because of this ...

His workload reduced.

And because of this ...

He had more leisure and enjoyed life.

And because of this ...

He stopped thinking.

Until finally ...

Artificial Intelligence surpassed human intelligence.

And ever since that day ...

Evolution of Human Intelligence is reversed.
